

Marine Anti-Fouling Coatings Global Market Segmentation and Major Players Analysis and Forecast to 2021

Marine Anti-Fouling Coatings Market 2016 Global Trends, Market Share, Industry Size, Growth, Opportunities and Forecast to 2021

PUNE, INDIA, February 1, 2017

/EINPresswire.com/ -- The global [marine anti-fouling coatings](#) market is valued at USD XX million for 2016 and is projected to reach USD XX million by 2021, at an estimated CAGR of XX % during the forecast period (2016-2021).

Marine Anti-fouling coatings are used to coat the bottoms of ships to prevent sealife such as algae and molluscs attaching themselves to the hull, thereby slowing down the ship and increasing fuel consumption. In the earlier days lime and later arsenic were used in the place of marine anti-fouling coatings. They are applied on the above mentioned surfaces to protect against corrosion, fouling and slimes thus increasing the durability and life of the marine vessels and offshore structures.

Market Dynamics

The global marine anti-fouling market is mainly driven by increasing production of leisure boats, increase in ship repairs and maintenance activities and growing demand from oil and gas industry. The market has few restraints; stringent government regulations and increased usage of high standard durable products which acts as road blocks for the market. Moreover, the rising consumption of commercial vessels, passenger ships, yachts, cargo and conventional offshore drilling rigs is expected to expand industry growth over the forecast period.

Market Segmentation

The global marine coatings market is segmented on the basis of products, applications, and geography. Based on type, the market is classified into Copper-based, Self-Polishing (Silver-

based), Hybrid and others. By application the market is segmented into Hull Coatings, Tank coatings and others.

The market has also been geographically segmented into Asia-Pacific, North America, Europe, South America, and the Middle East & Africa. Asia-Pacific region is expected to remain as the largest market for marine anti-fouling coatings, followed by Americas, and Europe. The Asia-Pacific market is projected to reach USD XX.XX million by 2021.

Opportunities and Major Players

The factors such as increasing expenditure on luxury goods and new innovative coatings and application technology will offer major growth opportunities for growth for lubricant manufacturers during the forecast period.

Major players for lubricants products include big global & local manufacturers are:

Axalta Coatings Systems

Akzo Nobel N.V.

PPG Industries

The Valspar Corporation

DuPont

Engineered Marine Coatings

Hempel A/S

Key Deliverables in the Study

Market analysis for the global marine anti-fouling coatings market, with region specific assessments and competition analysis on a global and regional scale.

Market definition along with the identification of factors instrumental in changing the market scenario and prospective opportunities.

Extensively researched competitive landscape section with profiles of major companies along with their market share.

Identification and analysis of the macro and micro factors that affect the global marine anti-fouling coatings market on both global and regional scales.
