Increasing demand of data and information management systems across the globe is expected to open new horizons for the growth of big data analytics market over the forecast period”

OMR Analyst

“The global population has shifted its focus from analog to digital technologies. This can be attributed to numerous advantages digital technology offers as compared to that of analog alternatives. Moreover, data grown immensely in the past decade, furthermore, the management of this data and the need to draw conclusions from this data is expected to create opportunities for the augmentation of the market in the near future. Big data analytics, provides this option for the industry giants in order to analyze the market trends, performance reviewal and various other comparative analysis of various financial parameters. There are numerous players which offer big data analytics

solutions which include Oracle Corporation, SAP SE, Microsoft Corporation, Hewlett-Packard Enterprise, Dell, Inc. among various others. The market on the basis of geography is divided among four major regions – North America,

Asia-Pacific (APAC), Europe, and Rest of the world. North America is the leading market and is expected to witness this growth owing to the increasing adoption of high-end technologies in the region and increasing awareness among the global players to adapt such changes in the technology. Europe is also expected to witness lucrative growth opportunities in the coming years owing to presence of numerous players in the region. Asia-Pacific market is expected to have the highest CAGR amongst all regions during the forecast period. This can be attributed to the increasing adoption of such technologies in the emerging countries.
