

Linen fiber Market 2019 Global Industry – Key Players Analysis, Sales, Supply, Demand and Forecast to 2024

Wiseguyreports.Com Publish Market Research Report On -“Linen fiber Market 2019 Global Analysis, Size, Share, Trends, Opportunities and Growth, Forecast 2024”

PUNE, INDIA, November 1, 2019 /EINPresswire.com/ --

[Linen Fiber Market 2019](#)

Linen is a textile that is manufactured from the fibers of the stalk plant or more specifically the cellulose fibers that are found inside the stalk of the flax plant. It is very time-consuming and labour intensive to manufacture but the finished product is absorbent, strong and dries very fast. It is stronger than cotton fiber and has an excellent resistance to degradation by heat. The resiliency of linen fiber is very low and it has a slightly silky nature.

The following top manufacturers are covered:

Castellins NV

COMLIN

FIR Group

DECOCK s.a.

Procotex Corporation

Van de Bilt seeds and flax bv

PROMAGRO

Linen of Desna

Fibrex NV

SWM

Jos Vanneste S.A.

Noorlin

RE for FLAX Company

Brille

A&A Demeulenaere & Co nv

For the flax fibers that are found in the stalk to be made into linen, they must first be separated from the stalk. Retting is the process by which the inner stalk is systematically rotted while the outer fibers remain intact. A few coarse fibers/straw remains. The flax is then broken into short, small bits and the straw is scraped away from the fiber with the help of hackles that act like combs to scrape the straw away. The fibers are then spun into the finished product, linen fibers.

The global linen fiber industry is defined and the industry overview is given in the report which is published on the global linen fiber industry. The distribution of the manufacturing plants globally is presented and the capacity of each plant to manufacture linen fibers is included in the report. The cost structure required to manufacture linen fibers and the price analysis of major

manufacturers of linen fiber around the globe are discussed in detail in the report along with the types and applications.

Market Segmentation

The global linen fiber market can be divided into different market segments based on the different types of linen fiber available in the market and the different applications that the linen fibers can be used for.

Market split based on the type:

Long flax fiber: The long fibers of flax are generally used for fabrics that have to feel smooth and soft.

Short flax fiber: They are used mainly for coarse fabrics

Market split based on the application: Depending on the different industries that use various types of flax fibers for different applications, it is categorized into:

Clothing

Automotive interior

Furniture

Home textile

Recreational supplies

Regional Overview

The report published on the global linen fiber market divides the world into several key regions which makes market segmentation and data collection easy. The volume and value of linen fibers at the company level, regional level, and global level are focused on. The overall linen fiber market size from a global perspective is represented by the analysis of prospects as well as the historical data available. The globe is divided into several key regions namely India, North America, Europe, Japan, China, and Southeast Asia while the import, export, consumption, and production of linen fibers in these areas is focused on.

Industry News

Südwolle has launched a new collection in response to consumer demands. The new Spring/Summer 2021 collection uses noble fibers and natural textures that require easy maintenance while ensuring a contemporary fit. In addition to silk, linen, and cotton, biodegradable fibers that use green production processes like viscose are also used.
