The academic software are designed to streamline operations such as library management, submission and evaluation management, learning management, alumni management, student management, appointment scheduling and performance management. The type of software depends upon the area of application. However, integrated software's are available which can combine the inputs from multiple platforms. Integrated software is majorly used in central administration in large universities and colleges.

The demand for academic software has been rising worldwide. The major catalyst for increase in demand for academic software has been the growing number of students globally. The number of student travelling across countries for education has been rising along the number of student opting for higher education. Additionally, developing countries are witnessing rise in the education sector wherein number of student enrollments in higher education is increasing at rapid pace. This growth in number of students has augmented the importance of management platform for efficient and effective academic management which in turn have fuelled the demand for academic software in educational institutions. Further, automating the workflows, assignment tracking system, document management, reporting, etc., has increased in recent years.
