World population is increasing rapidly, a trend that translates into potential growth in demand for household vacuum cleaners, which are electrical devices that create partial vacuum in order to suck dirt and dust from floors and surfaces. Demand for household vacuum cleaner globally can be closely correlated with the increase in population. Growing global population and the ensuing rise in urban settlements brings to fore the need for effective cleaning solutions. Technologically advanced household vacuum cleaners are being perceived as the most convenient and efficient means to obtain desired cleaning results in an era of busy and rapidly changing consumer lifestyles. Growth in the global population is more skewed towards emerging markets, with Asia alone accounting for a majority of the addition. As a result growth remains

tilted heavily in favor of emerging regions.

The market for vacuum cleaners is more globalized, as compared to laundry and kitchen appliances. A large number of vacuum cleaners available in the market today are manufactured in low-cost developing nations. Growing affluence of the middle-class population is a major factor encouraging people to invest in advanced home appliances to upgrade their lifestyles. Rising awareness regarding benefits of using vacuum cleaners is influencing households to purchase advanced vacuum cleaners to meet their routine cleaning needs.
