## Description

Wiseguyreports.Com Adds "Bike and Scooter Rental -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2026" To Its Research Database

Global Bike and Scooter Rental accounted for \$2.04 billion in 2018 and is expected to reach \$11.10 billion by 2027 growing at a CAGR of 20.7% during the forecast period. Sustainable and technologically advanced mobility and rise of micro-mobility as a budget-friendly mode of transportation are some key factors influencing the market growth. However, lack of supporting infrastructure for micro-mobility is hampering the market growth.

A bike rental or scooter rentals rent out bikes and scooters for short periods of time, usually for a few hours. Rentals are mostly provided by bike shops as a sideline to their main businesses of sales and service, but some shops specialize in rentals.

Based on the operational model, dockless segment is likely to have a huge demand due to the lesser requirement of hardware for securing and managing inventory. By geography, Asia Pacific is going to have a lucrative growth during the forecast period owing to increasing concerns over pollution as well as growing traffic congestion.
