PUNE, MAHARASTRA, INDIA, December 8, 2020 /EINPresswire.com/ -- LPG Tanker Market:

Executive Summary

Global LPG Tanker Market is valued approximately at USD 185 million in 2019 and is anticipated to grow with a healthy growth rate of more than 6% over the forecast period 2020-2027. Over the years, due to the rapid development in the global energy market, the demand for LPG tanker is also constantly growing all over the world. The constant development taken in energy market is to emphasize on getting the energy sources from natural resources, which can have advantages to society with enhancements to environmental issues. Due to this reason, many energy-based companies are now utilizing LPG tanker. An LPG tanker or LPG carrier is a type of gas tanker ship intended for transferring LPG in bulk. This tanker also used to carry some other gases, including propylene, vinyl chloride, and ammonia. The rise in production of gas around the world, surging demand for LPG in HVAC and cooking applications, and increasing government subsidies on LPG cylinders are the few factors responsible for the market growth during the forecast period. According to the International Energy Agency (IEA), in 2019, the production of natural gas around the world hit a new high, breaking the 4 Tcm threshold for the foremost time with 4,088 billion cubic meters produced, signifying an increase of 3.3% compared to 2018. Since the monetary crisis, the production of natural gas has been progressively rising at an annual compounded growth rate of almost 2.7%. This, in turn, is likely to strengthen the demand for LPG tanker, thereby contributing to the market growth around the world. However, the high cost of tanker and volatile prices of gas are the major factors impeding the market growth over the forecast period of 2020-2027.
