

World's First Health Security Company TESTZONE Partners with Leash IT To Bring Unique Health Screening To The Workplace

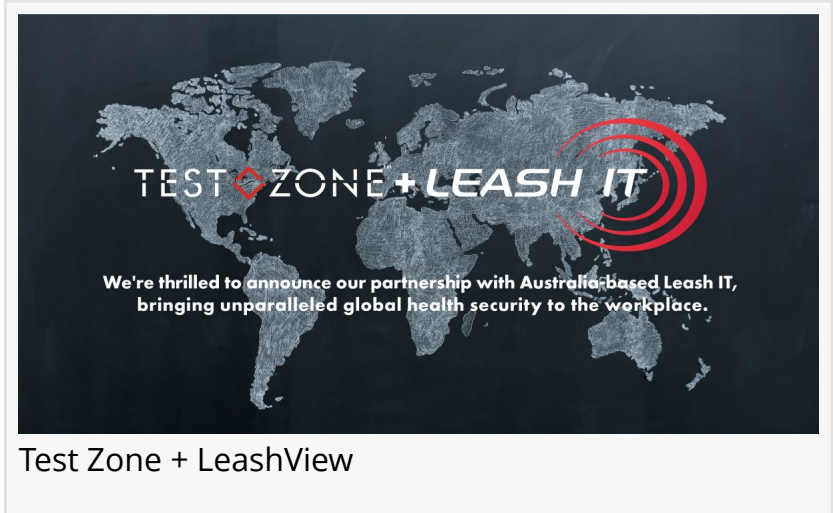

Innovative LeashView Platform Provides Location and Analytic Capabilities to Ensure Social Distancing and Contact Tracing in Variety of Industries

MELBOURNE, VIC, AUSTRALIA, May 11, 2021 /EINPresswire.com/ -- [TestZone™](#), a trusted provider of multi-layered health security solutions designed to make spaces safer, announces today a partnership with Melbourne, Australia-based Leash IT™ to utilize its [LeashView](#) platform, enhancing

TestZone's on site health security screening programs. For businesses of all kinds looking to keep employees healthy and the doors open, LeashView, built on highly accurate Bluetooth Low Energy (BLE) technology coupled with robust analytic capabilities, enables organizations to perform proactive social distancing, reliable contact tracing, access control monitoring and to limit the number of people per room or area. TestZone's proven turnkey programs include symptom screening, hygiene and sanitation measures, behavior change communications, fully-staffed onsite and at-home viral testing, and contact tracing.

"As more citizens get vaccinated the COVID-19 virus continues to rage in parts of the world, this is a critical time for industry. It's never been more imperative we get people back to work in a safe, effective manner. TestZone is very excited to partner with LeashView to significantly enhance our mission of making places safer," says David Orelowitz, co-founder and chief technology officer, TestZone. "LeashView comes to the partnership with a proven track record with more than 40 installations in Australia, Thailand, the UK and Israel, including hospitals and medical research institutions. Their innovative technology is precisely the type of solution we are looking to integrate into our core offering so that we can be on the front lines making sure businesses, sporting events, concerts, film productions and more, stay open and people stay employed."

The LeashView platform will enable your existing ID badge to intermittently emit Bluetooth pulses that lets us know where you have been and who you might have come in contact with. It

is designed to enhance confidence in the safety of the environment for all.

“A strategic Health Security program is now imperative for any arena, business or school and needs to become the new normal for organizations of all sizes. The combination of TestZone and LeashView provide the science expertise, data and traceability to protect staff and assets and mitigate any risks before they happen, and we are very excited to be on the front lines of this effort with the experts at TestZone,” says Tony Lotzof, CEO, Leash IT.
