

Global Microbiome Market Trends, Strategies, And Opportunities In The Microbiome Market 2021-2030

*The Business Research Company's
Microbiome Global Market Report 2021:
COVID 19 Growth And Change To 2030*

LONDON, GREATER LONDON , UK, June 24, 2021 /EINPresswire.com/ --

According to the new market research report 'Microbiome Global Market Report 2021: COVID 19 Growth And Change To 2030' published by The

Business Research Company, the global [microbiome market](#) is expected to grow from \$0.27 billion in 2020 to \$0.37 billion in 2021 at a compound annual growth rate (CAGR) of 37%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$0.94 billion in 2025 at a CAGR of 26%. The increasing prevalence of inflammatory bowel disease (IBD) is a key factor driving the growth of the microbiome market.

The microbiome market consists of sales of microbiomes drugs and related services. Microbiome therapy aims at restoring balanced gut microbiota and is expected to decrease the risk of infection recurrence and greatly increase the quality of life of patients.

Trends In The Global Microbiome Market

The growing technological improvement is a major trend gaining popularity in the microbiome market. Major companies in the microbiome sector are focusing on developing advanced technology solutions for microbiomes. For instance, in 2018, Seed, a new microbiome company, has introduced Probiotic and Prebiotic Daily Synbiotics for both females and males. The Daily Synbiotic Seed is the first to follow a microbe-system strategy with strain-specific advantages beyond digestive health such as cardiac safety, dermatological health, immune control,
