

Urinary Tract Cancer Market Current Therapies, Emerging Drugs and Treatment Outlook

Rise in prevalence of urinary tract cancer, surge in geriatric population bladder cancer research centers drive growth human growth Urinary Tract Cancer Market

PORTLAND, OREGON, UNITED STATES, December 21, 2021

/EINPresswire.com/ -- The immunotherapy segment held the highest Urinary Tract Cancer market share in 2020, holding nearly four-fifths of the total market share, and is expected to continue its leadership status during the forecast period. However, the same segment is estimated to register the highest CAGR of 19.1% from 2021 to 2030. The retail pharmacy segment held the largest market share in 2020, holding nearly four-fifths of the total market share, and is expected to continue its leadership status during the forecast period. However, the online pharmacy segment is projected to register the highest CAGR of 19.6% from 2021 to 2030.

North America contributed to the highest share in terms of revenue in 2020, holding nearly two-fifths of the total market share, and is estimated to continue its dominant share by 2030. However, Asia-Pacific is projected to manifest the fastest CAGR of 19.6% during the forecast period. Rise in prevalence of urinary tract cancer, surge in geriatric population, and increase in number of bladder cancer research centers drive the growth of the global urinary tract cancer market. However, risk associated with the use of drugs employed in urinary tract cancer restrains the market to some extent. On the other hand, increase in healthcare expenditure worldwide presents new opportunities in the upcoming years.

COVID-19 के कारण वैश्विक मूत्रमार्ग कैंसर बाजार में

- The outbreak of the COVID-19 pandemic has negatively impacted the global urinary tract cancer market
- Almost all the hospitals and cancer centers have reduced their outpatient capacity and conducting a triage to only select the patients that are in most need of a cystoscopy. This, in turn, caused cancellation and postponements of many non-essential surgical procedures across the world.
