The rising utilization of these energy systems across the defense sector to enhance network security against cyberattacks and risks of grid outages is primarily driving the North America microgrid market. Moreover, the ability of these systems to function under island mode, independent of all external power and data transmissions, is further catalyzing the market growth. Besides this, numerous technological advancements, including the introduction of control and dispatch strategies, improvement in load management, integration with inverter interfaced distributed generation (DG) systems, etc., are also augmenting the regional market. Furthermore, the launch of several favorable initiatives by government bodies to provide energy-efficient power solutions is expected to fuel the North America microgrid market in the coming years.

Report Scope:

- North America Microgrid Market

- Key Regions Analysed

- o United States

- o Canada

- Analysis for Each Country

- Market by Energy Source

- o Natural Gas

- o Combined Heat and Power

- o Solar Photovoltaic (PV)

- o Diesel

- o Fuel Cell

- o Others

- Market by Application

- o Remote Systems

- o Institution and Campus

- o Utility/Community

- o Defense

- o Others
