At present, North America dominates the market, followed by Europe. In 2017, the U.S. dominated the North America market, and UK led the overall market in Europe. On the other hand, in the Asia-Pacific region, China dominates the market.

Increase in air travel, modernization of airports, and technological advancements, such as RFID tags and NFC, drive the growth of the global airport baggage handling systems market. However, high upfront & maintenance cost of baggage handling systems and high consequences of system failure impede the market growth. On the contrary, utilization of robotization in the airports baggage handling process is expected to create lucrative opportunities for the key players operating in this market
