The new [CareCoin](#) is a hyper-deflationary cryptocurrency, built on the Binance Smart Chain, armed with amazing utilities and a comprehensive ecosystem with unique metaverse functionalities.

According to the developers, a decentralized financial system doesn't just offer transparency and lower cost cross-border payment options but also presents the unique opportunity for everyday people to leverage the strength of their massive transaction volume to make positive impacts all over the world.

CareCoin; The Currency of Giving

"We believe that decentralization is the key to empowering people all around the world to better protect their rights and that we can help the world get there, by increasing the adoption of

cryptocurrencies.”

The [charity-focused](#) cryptocurrency will be fully owned by community members who will also get to choose the humanitarian and socio-economic causes to support. Additionally, holders will get a physical crypto card with which they can process transactions wherever visa is accepted, as well as a CareWallet that supports some of the most popular cryptocurrencies such as Ethereum, BitCoin, and BNB.

The developers at CareCoin have also revealed that the ecosystem will include a CareVerse which will serve as a hub of Virtual Reality Categorized Interest Rooms, where people can come together to talk about specific ailments and conditions that affect them in real life.

“These special CareVerse rooms will be the hub for information and connections for accessing care better, faster, and cheaper than ever before.
