The global sustainable aviation fuel market is projected to grow at a CAGR of 47.89% during the forecast period (2022 – 2030). The growth of the global sustainable aviation fuel market is driven by a rising demand for cheaper fuel alternatives in the aviation industry, coupled with the rise in focus on environmentally friendly fuel sources to reduce the impact of climate change. However, costs and complexities associated with the processing of sustainable fuel sources will impede the growth of the market.
