Our experienced market research team has provided updated information on the ongoing COVID-19 pandemic and its adverse economic impact in the latter segment of the report. The coronavirus outbreak has led to drastic changes in the current Drug Screening business landscape, limiting the growth opportunities for various manufacturers and buyers for the next few years. Besides making speculations about the market's post-COVID-19 scenario, the report discusses its existing situation. The report eventually offers conclusive data related to the Drug Screening market growth assessed on both regional and global levels.

Key market participants include Quest Diagnostics, LabCorp, Drägerwerk, Thermo Fisher Scientific, Alfa Scientific Designs, Omega Laboratories, Roche Diagnostics Limited, Siemens Healthineers, Premier Biotech, and Psychemedics

In May 2020, Psychemedics Corporation launched a vaping panel to detect the use of nicotine, marijuana, and Cannabidiol (CBD). This test helps businesses and schools detect the presence of any drugs ingested by any means. It is specifically designed to combat the e-cigarette trend among youngsters.

Breathalyzers are used to estimate the content of alcohol from the breath. The product witnesses high demand as it is easy to acquire, it gives accurate results, and the test can be conducted from anywhere.

Breath samples have also been observed to offer various advantages for drug screening, as they are less intrusive, less invasive, and less time-consuming as compared to urine or blood samples
