The global Sports Medicine Market is expected to reach USD 8.05 Billion by 2027, according to a new report by Emergen Research. Sports medicine is generally taken to prevent injuries and also for the cure, recovery, and restoration of injuries in athletes during sports/games. Products are used for athletes to improve the condition during injuries and to prevent future progress of injuries.

The rise in the prevalence of sports injuries is a major factor in driving the market growth. The injuries include various kinds of strains and sprains. It also includes spondylolysis and spondylolisthesis, stingers, disc injury, and Scheuermann's disease. Sports medicine has undergone satisfactory growth from among other healthcare fields, as these treatments can be provided for other individuals as well and not just for athletes. The extended rise in the demand for sports medicine is due to an increase in sports injuries
