

Catheters Market Players Strategize Collaborations To Expand Their Market Share

The Business Research Company's Catheters Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON, UK, May 13, 2022 /EINPresswire.com/ --

Strategic collaborations between companies are one of the key [catheters market](#) trends that are gaining popularity. Companies in the catheters market are focusing on strategic collaborations to expand their research

and development activities in innovative products and improve their market share in their respective markets. For instance, Stereotaxis and Osypka have collaborated on the development of a next-generation magnetic ablation catheter with the integration of robotic technology of Stereotaxis. This has stimulated the growth potential of both companies in the industry.

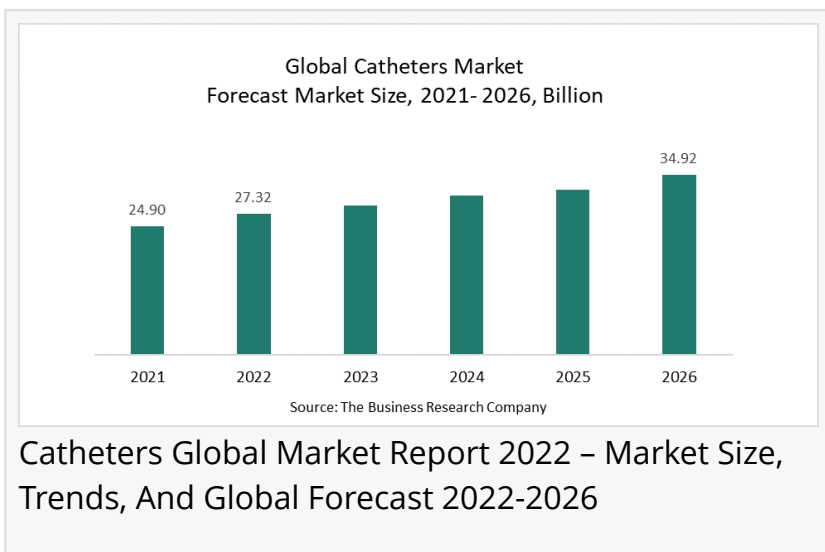

The rising prevalence of the cardiovascular disorder is driving the growth of the catheters market. Cardiac catheterization is a process in which a catheter is moved through a blood vessel to the heart for a better diagnosis of health conditions. The increase in the prevalence of cardiovascular diseases and the growing demand for cardiovascular treatment is expected to increase the demand for catheters. Thus, the rising prevalence of the cardiovascular disorder is expected to shape the catheters market outlook.
