

# Dermal Filler Market is expected to reach USD 4.87 billion by 2028

*A crucial element that is likely to lead the Dermal Filler Market developments is the expanding number of medical facilities around the world.*

HYDERABAD, TELANGANA, INDIA, May 24, 2022 /EINPresswire.com/ -- Dermal Filler Market is expected to reach USD 4.87 billion by 2028 from USD 2.5 billion in 2021 growing at a CAGR of 10% in the coming years. Dermal fillers are non-invasive procedures that are used to eliminate wrinkles and restore firmness in the face. Soft tissue fillers, which include polymers & particles, hyaluronic acid, and collagen, are injected into the skin to treat skin disorders like scars and wrinkles. Dermal filler operations are used to treat a variety of skin-related issues. Dermal fillers can be used to treat scars, wrinkles, skin smoothing, and other cosmetic operations.

## The Dermal Fillers Market - Growth Factors

Over the forecast period, the rising passion and preference for physical appearance, rising disposable income, and growing awareness about good looks as well as facial beauty are likely to boost the dermal fillers market growth globally. The shift in consumer choice from visible to non-intrusive operations is also projected to fuel demand for the target market. The growing senior population will have a significant impact on the industry expansion. Another significant factor expected to drive the global market during the forecast period is an increase in the number of

older people seeking dermal filler therapy to restore lost volume and enhance drooping skin. Hyaluronic acid therapy is the most fundamental treatment for elderly persons, as hyaluronic acid levels decline with age, causing wrinkles and dryness of the skin. On the other hand, challenges and risks associated with dermal fillers, such as skin infection and biofilm formation, may limit worldwide market expansion in the approaching years.

#### The [Dermal Fillers Market Trends](#):

- Consumers on the search for lower-cost goods
- Adoption of Combination Treatments

Restraining factors of the Dermal Fillers market:

- Patient Safety Concerns are growing
- Regulations are lacking.

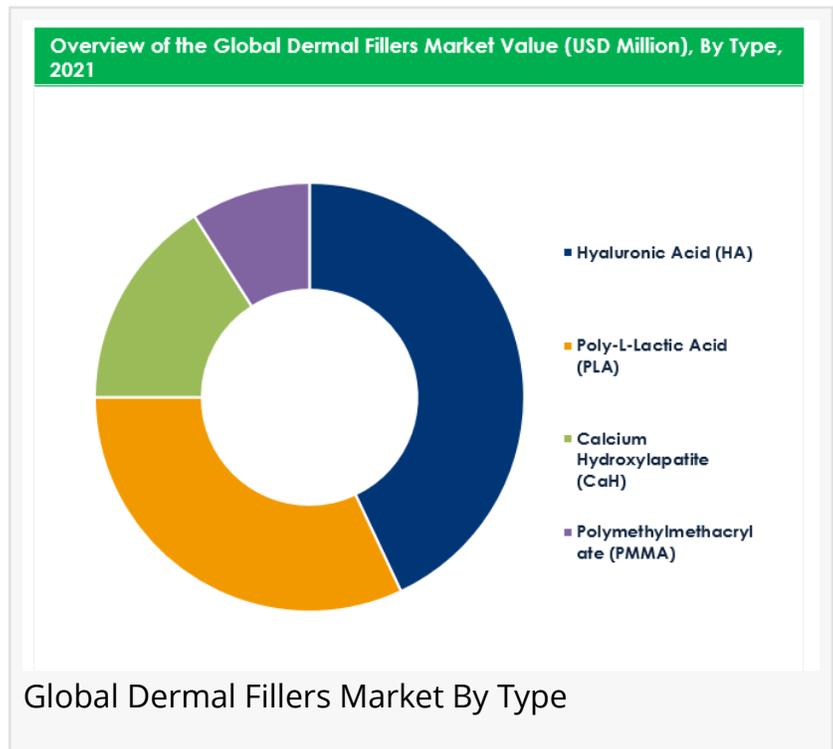

#### The Dermal Fillers Market – Segmentation

On the basis of type, the dermal fillers market is divided into Biodegradable and Non-Biodegradable. On the basis of material type, the dermal fillers market is segregated into Fats, Hyaluronic Acid, Poly-L-lactic Acid, Calcium Hydroxyl apatite (CaHA), and Polymethyl-Methacrylate Microspheres. In terms of application, the market is fragmented into Facial Line Correction, Face Lift, and Lip Enhancement. Lip enhancement is becoming increasingly popular, with the market growing at a considerable CAGR from 2020 to 2027. Dermal fillers are often used by women for lip enhancement to achieve plumper as well as fuller lips. Furthermore, fillers provide the lips a natural appearance at a low cost, and will thus be widely accepted in the future.

#### The Dermal Fillers Market –Regional Analysis

The global dermal filler market is anticipated to be dominated by the Americas. The increased number of cosmetic products, the growing senior population, the development of a new less invasive facial surgery, and escalating clinical trials to improve skincare products are all

contributing to the expansion of the American market. Increasing recognition of new aesthetic products, growing government support for the use of non-invasive dermal procedures, and an increasing number of product approvals and range of products across the region are expected to propel the market in Europe to the second-largest market share over the forecast period.

## Impacts of the COVID-19 Pandemic on the Dermal Fillers Market

The Dermal Filler Market has been impacted by COVID-19, which can be ascribed to severe interruptions in their particular manufacturing as well as supply-chain operations as a result of several preventive restrictions, lockdowns and other limitations implemented by leading bodies around the world. Also, because the over-all financial condition of most individuals has been significantly hit by this outbreak, customer demand has reduced as people are now more engaged on eliminating non-essential expenditures from their particular budgets.
