

Delivery Drone Services Market Growth Rate To Reach 49% With Increased Demand For Contactless Deliveries

The Business Research Company's Delivery Drone Services Market 2022 - Opportunities And Strategies - Global Forecast To 2030

LONDON, GREATER LONDON, UK, June 30, 2022 /EINPresswire.com/ --

Increased demand for contactless deliveries is predicted to drive demand for the delivery drone services market. Contactless delivery is a new delivery model that gained popularity due to the strict social distancing regulations

implemented by governments across the world during the COVID-19 pandemic. In this scenario, a delivery drone places an order outside the customer's doorstep to eliminate any kind of physical interaction. According to a recent survey by GetApp, a Spain-based independent business applications marketplace with a strong focus on SaaS and cloud-based app, in the year 2021, out of 1,000 U.S. consumers, 65% of customers say that contactless services align with their current health and safety priorities. Thus, contactless experiences are increasingly important for a positive customer experience. Therefore, increased demand for contactless deliveries is driving the delivery drone services industry growth.
