

Animal Healthcare Market Size, Share, Regional Outlook, Growth Trends, Competitive Strategies Forecast 2022-28

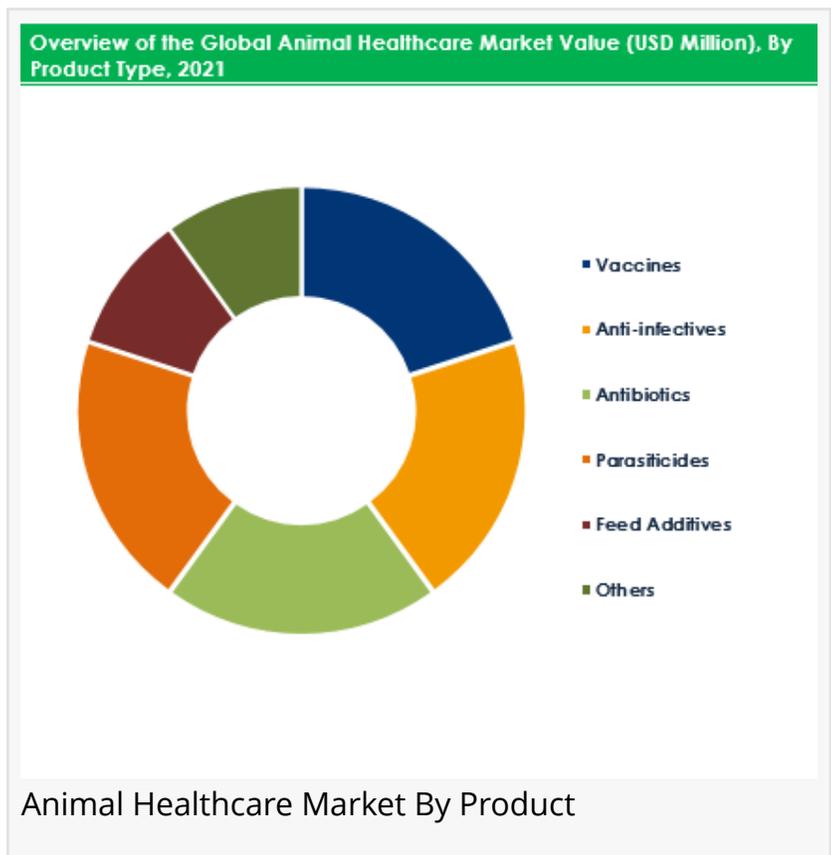

The growing adoption of e-commerce platforms supporting online pharmacies and the rising prevalence of zoonotic illnesses are predicted to boost the growth.

LONDON , UNITED KINGDOM, July 11, 2022 /EINPresswire.com/ -- The global [animal health market size](#) was valued at USD 64,376.3 million in 2021 and is expected to witness a CAGR of 8.5% over the forecast period. Protecting, managing, and maintaining animals against a variety of ailments is part of providing animal healthcare. It also entails giving animals the necessary veterinary care in order to boost their output and lengthen their lifespan. The market for animal healthcare is split into two categories: product and animal. Some of the most common examples of farm animals include cattle, poultry, swine, horses, and aquaculture, whereas companion animals include dogs, cats, as well as other small animals.
