The restaurant point of sale (POS) terminal market includes sales of restaurant POS systems by entities (organizations, sole traders, and partnerships) that are used to reduce turnaround time by accepting orders at the table and printing KOTs instantly. Restaurants deploy the point of sale systems to operate with improved efficiency, reduce billing time, monitor the order completion time, and avoid order errors during peak hours. They involve payroll management, inventory control, recording of sales figures, and billing to ensure the business functions. POS terminal systems are integrated with online ordering, E-wallets, table reservations, loyalty programs, and many others.

Global Restaurant Point of Sale Terminal Market Trends

Technological advancements have emerged as a key trend gaining popularity in the market. According to the restaurant point of sale terminal market analysis, major companies are focused on new technological solutions to meet consumer demand and sustain their position. For instance, in August 2019, Future Group, an India-based conglomerate, launched a cloud-based PoS system called LivQui based on Poynt's Smart Terminal technology. It provides an application
