

Smart and Solar Flower Market USD 41.87 Billion by 2028 - Says a New Research Report by Emergen Research

Rising need of sustainable energy, increase in autonomous solution, and growing concerns regarding production of ecofriendly electricity

VANCOUVER, BC, CANADA, July 14, 2022 /EINPresswire.com/ -- The global [Smart and Solar Flower Market](#) is expected to reach a market size of USD 41.87 Billion at a steady revenue CAGR of 15.7% in 2028, according to latest analysis by Emergen Research. This steady revenue growth can be attributed to production of ecofriendly electricity and autonomous sun tracking system are also factor driving the growth of smart solar flower market.

Increasingly stringent regulations to support conservation of environment across the electrical industry is resulting in deployment of non-conventional energy such as solar, wind, tides, and small hydro energy. In addition, increasing demand of ecofriendly energy resources is another factor driving the market growth. The technology development in the market is continuously driving investments in the solar panel industry, which is further boosting market growth, and the trend is expected to continue during the forecast period.

Smart and Solar Flower Market Size – USD 12.95 Billion in 2020, Market Growth – at a CAGR of 15.7%, Market Trends –increase in adoption of ecofriendly energy resource”

The major companies Covered in the report are:

JinkoSolar Holding Co. Ltd., Canadian Solar Inc., First Solar Inc., GCL-Poly Energy Holdings Ltd., SunPower Corp., SolarEdge Technologies Inc., Xinyi Solar Holdings Ltd., Yingli Green Energy Holding Co. Ltd., SMA Solar Technology AG, Atlantica Sustainable Infrastructure PLC.

Key Highlights of Report

In February 2021, JinkoSolar Holding Co. Ltd., which is the one of the world's largest and most innovative solar manufacture, entered into a new long-term partnership with Tongwei Co., Ltd. ("Tongwei") to jointly invest in high-purity crystalline silicon project with 45,000 metric ton annual capacity of silicon wafer project and produces 15 GW annually.

Off grid segment accounted for largest revenue share in the smart/ solar flower market in 2020, and the revenue growth rate is projected to incline rapidly during the forecast period. In an off-grid system consists of solar panel, inverter, charge controller and mounting structure, that accumulate the sufficient amount of sunlight during the day and use them to generate power during night which are the key factor to boosting the off grid system in solar flower market.

The radio frequency identification (RFID) revenue growth rate is projected to incline rapidly during the forecast period. Rapid increase in monitoring the sun efficiently is rising adoption of RFID to increase performance of solar flower.

Institutional segment accounted for the largest revenue share in the smart flower market in 2020, which is expected to incline rapidly during the forecast period. Increasing preference for smart flower due to steadily extension in arrays of panel and sensitive towards climatic adjustment are a key factor supporting the market growth.

North America accounted for largest revenue share contribution to global smart solar flower market in 2020. Increasing adoption of non-conventional energy such as solar, wind, and tide energy in countries in the region is driving market growth.

Emergen Research has segmented global smart solar flower market on the basis of connectivity, component, application and region:

Connectivity Outlook (Revenue, USD Billion; 2018–2028)

On Grid

Off Grid

Component Outlook (Revenue, USD Billion; 2018–2028)

SCADA

Smart Metering Devices

Radio Frequency Identification (RFID)

Application Outlook (Revenue, USD Billion; 2018–2028)

Commercial

Institutional

Residential

Radical Features of the Smart and Solar Flower Market Report:

The report encompasses Smart and Solar Flower market overview along with market share, demand and supply ratio, production and consumption patterns, supply chain analysis, and other key elements

An in-depth analysis of the different approaches and procedures undertaken by the key players to conduct business efficiently

Offers insights into production and manufacturing value, products and services offered in the market, and fruitful information about investment strategies

Supply chain analysis along with technological advancements offered in the report

The report covers extensive analysis of the trends, drivers, restraints, limitations, threats, and growth opportunities in the Smart and Solar Flower industry

Custom Requirements can be requested for this Report [Customization Available] @ <https://www.emergenresearch.com/request-for-customization/1165>

Thank you for reading our report. Customization of the report is available. To know more, please connect with us, and our team will ensure the report is customized as per your requirements.

About Emergen Research

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trend's existent in the market. Emergen Research has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
