Key Trends In The Global Wireless Telecommunication Carriers Market

The biggest forthcoming change in the telecoms industry is the emergence of fifth-generation mobile networks (5G), which is predicted to be shaping the wireless telecommunication carriers industry outlook. 5G is expected to be much faster than the present 4G network. The 5G network is yet to be commercially available and this new generation mobile network is likely to provide the capacity needed to support the IoT (Internet of Things) revolution. Low latency is another important feature expected from 5G.
