LONDON, GREATER LONDON, UK,
August 4, 2022 /EINPresswire.com/ --
As per The Business Research
Company's "Wireless Internet Services
Wireless Internet Services Global

Market Report 2022", the wireless internet services The global wireless internet services market size is expected to grow from \$596.42 billion in 2021 to \$650.03 billion in 2022 at a compound annual growth rate (CAGR) of 9%. The growth in the market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The wireless internet service market share is expected to reach \$879.80 billion in 2026 at a CAGR of 7.9%. The government initiatives aiming at developing infrastructure is a key factor driving the wireless internet services market growth.

Key Trends In The Global Wireless Internet Services Market

[Wireless internet services market trends](#) include companies increasingly implementing Li-Fi (Light Fidelity) technology to improve their service offerings. Li-Fi or light fidelity uses light signals to transfer data between devices and produces a greater range than Wi-Fi, with transmission speeds of up to 224 gigabits per second. Smart homes will rely on Li-Fi technology in the future because it is faster and more reliable as light cannot penetrate through walls, and the signal cannot be compromised from a remote location. For instance, Oledcomm is releasing a robust Network for LiFi optical wireless networking solutions for B2B & B2 G in 2020. With the launch of LiFiMAX in 2019, the Internet of High Speed via Invisible Light, Oledcomm is expanding its global leadership in LiFi.
