

# Idaho's Digline, Inc. selects 4iQ Solutions' Exactix One Call to provide new 811 ticket creation software

COLUMBUS, OHIO, UNITED STATES, August 31, 2022 /EINPresswire.com/ -- COLUMBUS, Ohio, Aug 31, 2022 – 4iQ Solutions, the industry leader in providing premiere software technology to the damage prevention industry, announced today they have been selected as the new 811 ticket creation system partner for Idaho Digline, Inc.

"The Digline and 4iQ teams are working together to build a new strategy to improve the quality of the one call ticket, increase the precision of the dig site, and most importantly, improve the safety for stakeholders throughout the State of Idaho," said Jason Adams, CEO of 4iQ Solutions. "Leveraging the latest technology with Exactix One Call will provide the excavation community in Idaho with the most precise and straightforward platform for creating a dig request."

With over 50 years of experience serving the damage prevention industry, 4iQ Solutions introduced Coursettra Learning Management System (LMS) in 2016. Coursettra is widely accepted as the leading solution for curriculum, training, and education in the 811 industry. 4iQ proudly introduces the next revolution in accuracy and safety for 811 Centers, Exactix One Call. This new software transforms the method and design of current ticket creation platform standards, easing the use for the one-call centers and their customers.

With the introduction of 4iQ's, Exactix One Call, Digline, Idaho will become the thirteenth state to select this new technology to lead their continued damage prevention efforts. With over 10 million one-call tickets created by the Exactix platform annually, Idaho joins the fastest growing and most successful one-call platform in the damage prevention industry.

"4iQ was evaluated along with other leading software providers and showed itself to be far above the others in terms of technology and support. Our Digline team is looking forward to sharing this software with the stakeholders in Idaho. We are fully committed to using this

platform to bring more efficiency, accuracy, and safety to our utility members and excavators,” stated Julie Maki, Digline General Manager.

Digline President, Chuck Page states, “Our goal is to bring the entire State of Idaho a solution that is going to assist in safe construction and growth. We are fortunate in Idaho to have seen incredible growth in the past several years and we want to ensure those helping us build a better future are safe and the infrastructure to build this growth continues.”

The team from 4iQ will be working with Digline staff to develop the software and not only use it to identify and deliver dig requests, but also integrate the software into other aspects of the organization to share data for added personalization, streamline business processes, and value.

“We are extremely excited to build a strong relationship with Digline,” says Jeff Law, 4iQ’s President. “We believe Exactix One Call will deliver the most advanced ticket creation system working with the Digline team. Our strategy of building software solutions by directly interacting with our clients has resulted in creating some of the most powerful tools in the industry.”

#### 4iQ Bio:
