EHRs are patient-centered and real-time digital records that make patient data available instantly and securely to authorized healthcare professionals. The record comprises information regarding patient's medical history, medications, allergies, treatment plans, diagnoses, immunization dates, radiology images, and laboratory test results. The factors such as the increasing adoption of EHRs, rising incentives by federal government, and growing incidences of medication errors drive the growth of the electronic health record (EHR) market.

Based on installation type, the electronic health record (EHR) market is bifurcated into cloud-based and on-premise. The cloud-based segment held a larger share of the market in 2020, and the same segment is anticipated to register a higher CAGR in the market during the forecast period.

Cerner Corporation, Computer Programs and Systems, Inc., Allscripts Healthcare Solutions, Inc., McKesson Corporation, Epic Systems Corporation, NextGen Healthcare, eClinicalWorks, Greenway Health, AdvancedMD, Inc., and CureMD Healthcare are among the major companies operating in the global electronic health record (EHR) market.
