Be ready to be catapulted into the real world of international intrigue! Oil tankers are sunk. An attack on the Suez Canal. Who benefits from actions like these? You'll find out in RED CHAOS."

In Red Chaos, Dan Reilly investigates a rash of terrorist attacks around the world. As the president of the international division of the Kensington Royal Hotel Corporation, it's his job to stop trouble before it reaches red, the deadliest level in his five-tier Red Hotel threat assessment plan.

The Arctic ice is melting, the waters are warming, and Russia's ever-expanding fleet of oil tankers grind through the Northern Sea Route to China. With a fleet of nuclear ice

breakers clearing the way, Russian ships were setting new records to reach China and fulfilling a simple equation: Russian President Nicolai Gorshkov needs China's money to fund his

expansionism plans past Ukraine and Latvia while China, the thirstiest oil nation in the world, needs affordable fuel.

But ongoing competition from the West and Middle East nations threatens Russia's ability to monopolize the market and, as a result, Gorshkov initiates a devilish plot to make traditional shipping routes impassable. Working through third-party countries, attacks shut down the Suez Canal and other key routes. With oil futures and the global economy at stake, secret information passes between two countries, affecting the future of three – the United States, China and Russia.

Dan Reilly, a freelance State Department and CIA consultant, working full-time as International President Kensington Royal Hotels, is drawn into a web of intrigue involving the current American president, a U.S. senator, a cunning Chinese businessman, and the death of a young girl.

How these seemingly different elements have a profound impact on Russia's far-reaching plans is what makes Red Chaos a thriller to be read like breaking news.
