Vaccines are preventive medical preparations that help enhance body's immune system. There are two types of cancer vaccines – preventive and therapeutic cancer vaccines. There is a rise in research on vaccines for breast, lung, colon, skin, kidney, and prostate cancer, among others. For instance, in August 2019, researchers at Victoria University, Melbourne published an article on "Cancer Vaccines: Research and Applications." The article stated the mechanisms for understanding tumor microenvironments and immunosuppression — all of which are useful for improved cancer vaccine design. Similarly, in February 2019, Springer Nature Limited published a review article—Turning the corner on therapeutic cancer vaccines—stating that recent advances in several areas are rekindling interest and enabling progress in the therapeutic cancer vaccine development.

In terms of geography, the global cancer vaccines market is segmented into North America, Europe, Asia Pacific, the Middle East and Africa, and South and Central America. North America held the largest market share in 2019. Increasing research and development activities, rising number of product approvals, growing awareness about vaccination and preventive therapy, and escalating demand for advanced anticancer therapeutic solutions are the major factors fueling the growth of the market in this region.

Key Players Analysis : CSL Limited, ADURO BIOTECH INC., Astellas Pharma Inc., Merck & Co., Inc., Sanofi, Bristol-Myers Squibb Company, Glaxosmithkline Plc., Dendreon, ASTRAZENECA PLC., and OSE Immunotherapeutics are among the leading companies operating in the cancer vaccines market.
