The Business Research Company

Global Market Report 2022” forecasts the [hospital asset tracking and inventory management systems market size](#) is expected to grow from \$23.23 billion in 2021 to \$25.12 billion in 2022 at a compound annual growth rate (CAGR) of 8.2%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The hospital asset tracking and inventory management systems market is expected to reach \$31.97 billion in 2026 at a CAGR of 6.2%.

The growing load of patients in hospitals has contributed to the growth of the hospital asset tracking and inventory management systems market going forward.

Hospital Asset Tracking and Inventory Management Systems Market Trends

Growing implementation of real-time locating systems (RTLS) is a key trend gaining popularity in the hospital asset tracking and inventory management systems market. Major companies operating in the hospital asset tracking and inventory management systems sector are focused on the implementation of real-time locating systems (RTLS) to strengthen their position in the market.

Hospital Asset Tracking and Inventory Management Systems Market Overview

The hospital asset tracking and inventory management systems market consists of the sale of hospital asset tracking and inventory management systems or related services by entities (organizations, sole traders, and partnerships) that refers to a method used to track and monitor the use of the equipment and medical devices in hospitals through a software. The hospital asset tracking and inventory management systems use sensors and tags that track the assets of the hospitals and provide real-time data and play a crucial role in locating medical equipment at times of an emergency in hospitals.
