The corrosion under insulation (CUI) & spray-on insulation (SOI) coatings market consists of sales of corrosion under insulation (CUI) & spray-on insulation (SOI) coatings by entities (organizations, sole traders, and partnerships) that are used for the protection of metal and metal components from degradation and decomposition due to exposure to moisture, oxidation, and heat exposure. Corrosion under insulation refers to corrosion of steel and iron equipment due to the entry of moisture from insulation vents. Spray-on insulation coating is an epoxy-based coating applied to the inner lining of insulation pipes in the form of compressed air. The coating can prolong the service life of the pipeline and protect it from corrosion.

Global Corrosion Under Insulation (CUI) & Spray-On Insulation (SOI) Coatings Market Trends
Strategic partnerships have emerged as a key trend gaining popularity in the corrosion under insulation (CUI) and spray-on insulation (SOI) coatings market. Major companies operating in the corrosion under insulation (CUI) and spray-on insulation (SOI) coatings sectors are entering into a partnership to expand their corrosion under insulation (CUI) and spray-on insulation (SOI) coatings market. For instance, in June 2020, BASF, a German-based chemical manufacturing company specializing in coatings, entered into a partnership with GACNE. The partnership aims to improve GACNE's paint shop operations and decision-making. BASF will supply technical know-how, including administration of the paint facility and thorough color development. BASF has taken over as GACNE's only coating supplier, including e-coat, primer, the basecoat, and clear coat. GACNE is a China-based automotive manufacturing company. Moreover, in February 2020, PPG Industries Inc., a US-based paints, coatings, and specialty materials company, collaborated with Dow and its Sustainable Future Program for an undisclosed amount. The collaboration focuses on development to accelerate the adoption of low-carbon technologies. Further, it focuses on advances in anti-corrosion coating products for steel, designed to deliver reduced greenhouse gas (GHG) emissions through increased energy efficiency while helping to lessen the high maintenance costs of steel infrastructure. Dow is a US-based chemical company that manufactures coatings and insulation material and products.
