Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions

The Steinberg Law Group has decades of proven experience and the resources to help victims of asbestos exposure and their families obtain the financial compensation they deserve. All of it.

We support our military veterans.

that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2022 were exposed decades ago.

We are affiliated with doctors around the country.

Although New Hampshire does not have any natural asbestos deposits or asbestos mines, the state does have an above-average mesothelioma death rate. Abundant use of asbestos at dozens of jobsites around New Hampshire helps explain the abnormally high number of mesothelioma deaths. Residents of New Hampshire who worked in shipbuilding, manufacturing, power plants and the military are at an elevated risk of developing asbestos-related lung cancer or mesothelioma.
