The general aviation market is segmented based on components, aircraft, and geography. Based on component, the market is categorized into avionics, airframe, landing gears, engine, and others. Based on aircraft, the global general aviation market is divided into fixed-wing and rotary-wing. Geographically, the general aviation market is primarily segmented into North America, Europe, Asia Pacific, the Middle East and Africa, and South America.

Charter operators are expanding their service lines by adding newer routes to them. Along with this, the growing need for non-scheduled business travel compels them to add new aircraft to their existing fleets, which propels the demand for business jets and turboprops across the

world. On the other hand, the demand for light sport and trainer aircraft is persistently growing worldwide. The rising interest of millennials toward aircraft piloting as their career is boosting the demand for aviation training, thus contributing to the surge in general aviation aircraft deliveries across different regions. Moreover, a few charter aviation vendors witnessed a rise in their revenues during FY 2020. In 2021, Club One (a chartered air services provider company in India) announced that it has ended 2020 better than 2019 with a 10% increase in business, despite the business loss during the lockdown period. Club One is expected to retain this trend during FY 2021 owing to the absence of regular international and domestic flight services and preference for safety, health, and hygiene coupled with the need to adhere to social distancing norms for domestic travel across different regions. The corporate sectors across the globe are the top consumers of charter aviation due to the burgeoning requirement of air travel for attending cross-border meetings and operational sessions planned among business personnel. The abovementioned factors are propelling the demand for helicopters for domestic travel operations.

General Aviation Market research report provides an in depth examination of the key factors stimulating market expansion. It also sheds light on the challenges or restraining factors that are poised to hinder industry growth over the forecast timeframe. Growth rate, market share captured, and valuation estimates for each region, segment, and company are documented as well.
