

# Winners Choice Gaming Now Offering ID-Activated Door Locks For Gaming Rooms

*The ID-activated door locking machines, powered by IDScan.net's VeriScan software, unlock the door after verifying that the customer is 21+*

CHICAGO, ILLINOIS, UNITED STATES, February 9, 2023 /EINPresswire.com/ -- Winner's Choice Gaming announced the installation of their first ID scanning activated door locking device outside the gaming room of a Smithton, Illinois grocery store. The device, powered by IDScan.net's [age verification software](#), scans the 2D barcode on a customer's ID, and transmits an "unlock" signal only when the scanner verifies that the individual is 21 years of age or older. VeriLocks provides an additional line of defense to combat underage gaming, physically securing the room which houses the gaming machines.

The global slot machine market is expected to grow by \$9.77B between 2022 and 2026. Illinois legalized video gaming in July 2009. There are now nearly 8,500 licensed establishments housing video gaming machines. These establishments are largely [bars and nightclubs](#), but also include truck stops, veterans associations, and retail locations. While bars are, by nature, 21+ environments, truckstop and in-store gaming areas require restricted areas, within view of an attendant.

"Helping keep our customers compliant is crucial as a Terminal Operator. Even the most conscientious clerks are challenged with keeping a close watch on age-restricted gaming areas during busy times. And fines for allowing minors inside these areas can be hefty," said Winner's Choice CEO John Galle. "VeriLocks is another key arrow in our quiver to provide additional protection against minors accessing gaming rooms in non-bar establishments."

ID-activated access control has broad applications outside of just gaming. Using Allow Lists, this

ID Activated door lock installation on the gaming room at an Illinois grocery store

type of access control can eliminate the need for visitors to carry separate RFID cards, instead using their existing IDs as their entry card.

#### About IDScan.net
