Trending Hypolipidemics Market Trend

Companies in this market are increasingly investing in using data generated from wearables in clinical trials to improve the speed, and efficiency of trials, and therefore reduce overall costs. By

continuously capturing data from patients via wearable technologies, clinical trial sponsors may be able to reduce the burden of frequent site visits, which could improve patient dropout rates and overall clinical trial efficiencies. The use of wearables helps to tackle the challenge of patient recruitment, helps in monitoring patients, gives accurate and real-time data, and gives earlier decision-making opportunities, while the patient is undergoing a clinical trial. Pharmaceutical companies such as Sanofi and Pfizer have already invested in wearable technology to treat hypolipidemia.

[Hypolipidemics Market Segments](#)

By Product Type: Cholic Acid Regulator, HMG-CoA Reductase Inhibitors, Adenylate Cyclase Inhibitors, Nicotinic Acid Drugs, Other Types
