A medical product with collagen as a part are being studied to treat several conditions. Owing to its clinical and consumer acceptance, it is widely used as medical material. Collagen based medical products such as bioprosthetic heart valves, arterial replacements, sutures used in surgical procedures, and wound dressings have been widely used. Thus, several research studies are being conducted to develop new collagen-based medical products. For instance, in 2020, MPM Medical initiated its CoMatryx Surgical Bovine Collagen Study. CoMatryx surgical collagen powder is a soft tissue repair product, which is made of 100% Type-I Bovine collagen.

Further, research is also being conducted to discover new sources of collagen for medical biomaterials. For instance, the study 'Tilapia (*Oreochromis aureus*) Collagen for Medical Biomaterials' was published in 2018. In this study, the researchers studied the potential of tilapia skin as an alternative source of collagen for its application in medical biomaterial. Thus, increasing research activities for collagen-based medical products is likely to favor the growth of the market during the forecast period.
