Enhanced Healthcare Access in Developing Countries  
One of the key catalysts for the market's growth is the anticipated improvement in healthcare access across developing countries. This positive trend is attributed to the effective implementation of health plans, particularly evident in regions such as India, China, and various Latin American countries.

Notable country-specific health reforms contributing to enhanced healthcare access include China's urban resident

basic medical insurance and new rural cooperative medical insurance schemes, Brazil's unified health system, and Mexico's popular health insurance. The increasing accessibility to healthcare services emerges as a significant driver propelling the hospitals and outpatient care centers market forward.
