

POWR2 POWRBANK MAX Wins New Equipment Digest's Innovation Award 2023

POWR2 is thrilled to announce that the POWRBANK MAX BESS has been named the winner of the NED Innovation Award 2023 in the Electrical & Electronics category.

BETHEL, CT, USA, December 5, 2023 /EINPresswire.com/ -- POWR2, a leading provider of cutting-edge energy storage solutions, is thrilled to announce that its revolutionary product, the [POWRBANK MAX](#), has been named the winner of the New Equipment Digest's Innovation Award 2023 in the Electrical & Electronics category. The New Equipment Digest's Innovation Awards recognize and celebrate the most innovative products and solutions within the manufacturing industry.

The annual reader-choice program, featuring 15 different categories, is a testament to the industry's commitment to excellence and progress. New Equipment Digest selects winners through its audience of industry experts, including plant managers, engineers, and industrial buyers. The rigorous judging process ensures that only the most groundbreaking and forward-thinking products receive this prestigious accolade.

POWR2 POWRBANK MAX NED Award Winner 2023

POWR2 Battery Energy Storage Systems

The POWRBANK MAX stands out as a rental-ready, emission-free energy storage solution. As the largest POWRBANK model, the MAX utilizes clean and silent energy storage for a wide range of

We are honored to receive the NED Innovation Award. The recognition underscores our commitment to delivering cutting-edge solutions that exceed the evolving needs of the energy storage industry."

Toby Nunn, CEO at POWR2

temporary applications. Engineered to handle loads like tower cranes, pumps, and hoists, it boasts an impressive power output of up to 500kW.

One of the unique features of the POWRBANK MAX is its ability to effectively manage the power demands associated with equipment start-ups. In applications such as tower cranes, where there are frequent starts and stops, traditional power sources often face challenges with large spikes in demand. The POWRBANK MAX eliminates the need for generator over-sizing by efficiently handling both peak demand at engine start-up and low loads during

operation.

"We are honored to receive the New Equipment Digest's Innovation Award," said Toby Nunn, POWR2 CEO. "The recognition underscores our commitment to delivering cutting-edge solutions that not only meet but exceed the evolving needs of the energy storage industry. The POWRBANK MAX represents a significant leap forward in temporary power, providing a reliable, clean, and efficient power solution for a variety of applications."

POWR2 is proud to be at the forefront of innovation in the temporary power sector, and the recognition from New Equipment Digest further solidifies the company's position as a leader in providing sustainable and high-performance power for various industries.
