Heptanoic acid is an aliphatic carboxylic acid, also known as enanthic acid, an organic compound composed of a seven-carbon chain terminating in a carboxylic acid functional group. It's a white, greasy liquid with a robust putrid stench. It helps to mask the odor of some rancid oils. It is merely soluble in water but highly soluble in ethanol and ether. Heptanoic Acid prepares esters for the fragrance industry, contributing to the scent and aroma of various products.
