## Rising Crop Production Expenses Fuel Market Growth

The fruit and nut farming market is being propelled by the upward trajectory in crop production. Crop production involves cultivating crops for various purposes, including

human and animal consumption. Increased demand, technological advancements, market growth, diversification, and innovation are driving this surge. For instance, in the UK, the total crop output rose to \$14,034.6 million (£13,330 million) in 2022, marking a substantial increase from the previous year. This heightened crop production is a significant driver of the fruit and nut farming market's expansion.

## Surging Demand for Organic Fruit and Nut Production

The market is witnessing a surge in the demand for organic fruit and nut production. Organic cultivation involves practices that exclude synthetic chemicals, genetically modified ingredients,

and harmful additives. Consumers are increasingly inclined towards sustainable, environmentally friendly, and additive-free products. In 2021, organic fruit sales in the US generated \$21 billion in revenue, reflecting a notable 4.5% increase from the previous year. This growing preference for organic options is a key driver of the fruit and nut farming market.

### Increasing Adoption of Agribots in Fruit and Nut Farming

Agriculture robots, or agribots, are gaining prominence in fruit and nut farming due to a shortage of labor and the need for advanced agricultural tools. These robots are employed for various tasks, including pruning, weeding, spraying pesticides, and harvesting. The Energid Citrus Picking Robot System, for example, significantly enhances productivity by picking an orange every two seconds, addressing labor shortages and boosting overall efficiency in fruit and nut farming.

### Innovative Offerings: Bactopure in Fruit and Nut Farming

Companies in the fruit and nut farming market are focusing on innovation to provide reliable services to customers. One notable example is the introduction of Bactopure, a pasteurized nuts and dried fruits product that is 100% natural and chemical-free. Companies like VKC Nuts Private Limited in India launched Bactopure under the Nutraj brand. Bactopure is positioned as a healthier and safer food option, being 99.99% bacteria and pathogen-free. This innovative product showcases a commitment to meeting consumer demands for safety and quality in food products.

### Regional Landscape and Market Segmentation

In 2023, Asia-Pacific emerged as the largest region in the fruit and nut farming market, with Western Europe following as the second-largest region. The fruit and nut farming market covered in this report is segmented –

- 1) By Type: Orange Groves, Citrus Groves, Noncitrus Fruit And Tree Nut Farming
- 2) By Farming Process: Organic Fruit And Nut Farming, Traditional Farming
- 3) By Application: Hypermarkets Or Supermarkets, Convenience Stores, Other Applications
