Solerity Awarded STI Contract for Advanced Data Support and Mission Integration with the Army's SDDC

Solerity awarded STI support contract for Army's SDDC, enhancing EDI, data management, and mission support through ISDDC's comprehensive data solutions.

MCLEAN, VIRGINIA, USA, February 12, 2024 /EINPresswire.com/ -- Solerity has been awarded the Surface Transportation Information (STI) support contract to support the Army's Surface Deployment and Distribution Command (SDDC) Enterprise Electronic Data Interchange (EDI) activities, Enterprise Data Management and Data Quality activities, and Integrated Mission Support for Surface Deployment and Distribution Command (ISDDC) system. ISDDC is SDDC's repository of cleansed and integrated surface transportation data. ISDDC provides detailed and aggregate-level information via robust ad-hoc query, pre-formatted reporting and business intelligence analytical reporting tools. The application also provides a mapping capability to enable greater visibility to the warfighter.

SDDC's automated systems are considered authoritative, reliable, and trusted only if the data within those systems are accurate, timely, and complete. Since much of SDDC's business is conducted via EDI transactions and the EDI transactions are key to other information within the enterprise, it is logical that the EDI team be closely aligned with the enterprise's data management and data quality support. Solerity provides the data management team which analyzes data across the enterprise to capture and document data requirements within the SDDC/G6 systems and within the systems' data exchanges. The data quality team is another enterprise-wide activity – supporting not only the G6 systems and the Enterprise Architect, but also the functional communities within SDDC. "Solerity has been a

service provider to SDDC for over 10 years and is proud to continue providing enterprise level data support to ensure commanders have the right information, at the right time, in order to make the best decisions in support of National Security objectives. With this award, Solerity continues to grow our software engineering and data analytics service offering enabling SDDC to achieve their mission." Said Greg Schwartz, Senior Vice President, Program Delivery.
