

Small Businesses and Entrepreneurs Lap Up Payroll Funding by Credit Card Feature from Zil Money

Business owners can easily fund payroll using any credit card.

TYLER, TEXAS, UNITED STATES, June 10, 2024 /EINPresswire.com/ -- Zil Money, a leading B2B payment platform, has seen a surge in small businesses signing up for its [Payroll by Credit Card](#) feature. It allows businesses to easily process payroll using credit cards, helping those with cash flow issues to meet employee wage payments on time. Additionally, business owners find it convenient to convert credit card payments to printed or email checks and access past transaction data. Many businesses have also integrated Zil Money with their preferred accounting platforms for quick processing and a centralized view of all payments.

Zil Money's payroll funding via credit card offers several advantages beyond quick funding. Businesses can save on expenses through cash-back rewards, tax benefits, and improved cash flow management. Most processing charges from using a credit card for payroll are offset by cash-back points and tax savings, effectively reducing the overall cost. This feature helps businesses manage their finances better, allowing them to reinvest the savings back into their operations. Additionally, the convenience of using a credit card for payroll enhances financial flexibility, making it easier for businesses to handle unexpected expenses and maintain smooth operations.

With Zil Money's Payroll by Credit Card service, each transaction allows businesses to accumulate reward points, offering added value with every payment. These rewards can translate into significant savings, providing a financial boost that can be reinvested into the business. Credit cards can expedite the payment process, ensuring that employees are compensated promptly even when cash flow realized from operations is facing delays – a normal situation in many small businesses. Enabling payroll by credit cards is thus a big relief for many entrepreneurs facing such business realities on a day-to-day basis. It helps them maintain employee satisfaction and

trust, as payroll delays are minimized. The service also provides financial flexibility, allowing businesses to manage cash flow more effectively and easily handle unexpected expenses.

Zil Money Corporation offers its products and services for business finance management. Zil US, ZilMoney.com, and OnlineCheckWriter.com – powered by Zil Money, are focused on simplifying business finance. The Software as a Service (SaaS) payment platform seamlessly integrates with over 22,000 banks and financial institutions. This broad integration network ensures users can easily manage multiple accounts from various banks in one centralized platform. By consolidating financial activities, businesses can streamline their operations and gain better control over their finances. Additionally, the platform's user-friendly interface and intuitive features make it simple for users to navigate and leverage its capabilities effectively, further enhancing efficiency in managing business finances.

With over 950,000 users and transactions exceeding \$75 billion, Zil Money's global presence is fueled by constant innovation and service enhancements, catering to diverse financial needs worldwide. Its user-friendly platform accommodates various requirements, from payroll management to invoicing and accounting. Additionally, the availability of a dedicated mobile app, downloadable from the [Google Play Store](#) and [iOS App Store](#), ensures convenient access for users, reflecting Zil Money's commitment to seamless financial management on the go.
