"In 2019 Entrex authored a white paper proposing transparency and accountability standards for the voluntary market. Today the Administration has recognized and implemented the development of such accountability across the voluntary sector. "Working together with ECOinvest we can additionally support our broker/dealer network and their carbon offset

producing clients" said Tom Harblin Partner. "Our focus is both establishing new quantifiable projects, which create carbon offsets, while supporting the capital needs of these projects. Often these are new and incremental revenue streams for these clients which make it a win-win

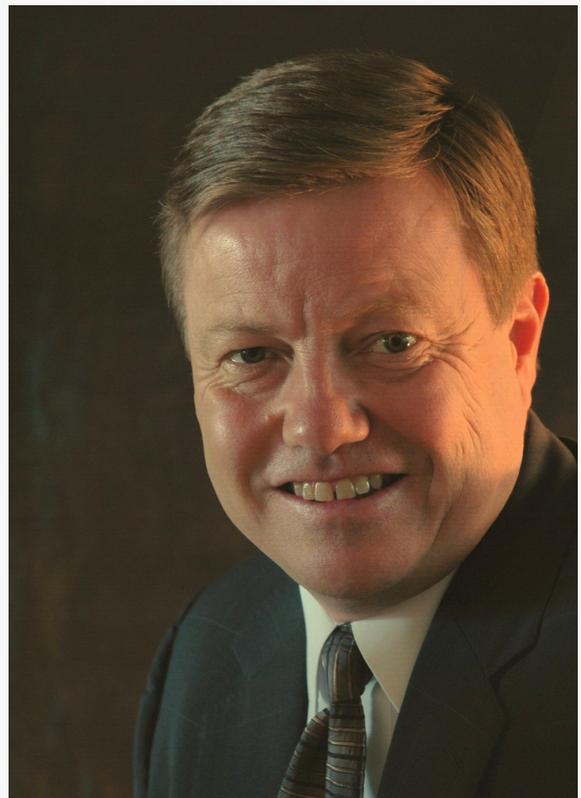

for brokers, their clients and the environment”.

“Entrex has a series of projects we anticipate announcing this week” continued Harblin. These will become the foundation of the ECOinvest fund while each will meet the Biden Administration’s interests in a high Integrity voluntary carbon market.”
