

Go-Station to Build Electric Vehicle Charging Network in Canada

VANCOUVER, BRITISH COLUMBIA, CANADA, June 10, 2024 /EINPresswire.com/ -- [Go-Station](#) is excited to announce its entry into Canada by installing no-cost, state-of-the-art electric vehicle (EV) charging stations at retailers, fuel centers, corporate offices, and multifamily developments. These installations aim to further Go-Station's commitment to reducing the world's carbon footprint through global EV charging infrastructure expansion.

"Our move into the Canadian market was spurred by a combination of the government's favorable carbon credit incentives encouraging businesses to go green and by its ambitious goal of achieving 100% light-duty Zero Emission Vehicle (ZEV) sales by 2035. Leveraging carbon credit programs has enabled Go-Station to viably fund EV charging locations in high-traffic areas in British Columbia such as Vancouver and Victoria. We are delighted to be leading the way in building out Canada's state-of-the-art charging network to help achieve 100% ZEV sales in the next decade," Andrew Hisey, Go-Station's President and CEO, explains.

Carbon credits are a way for governments to encourage organizations to reduce their carbon pollution and other greenhouse gases by measuring emissions, setting reduction targets, and incentivizing investment in clean energy projects.

Canadian businesses interested in hosting no-cost, state-of-the-art EV chargers on their company-owned property should contact Go-Station at info@Go-Station.com.

About Go-Station:

Go-Station is an EV charging company dedicated to building a world where every driver has confidence in owning and driving an electric vehicle. The company serves drivers, multi-family developments, workplaces, parking facilities, healthcare, businesses, and fleet operators seeking to go electric by offering a full range of charging solutions, including turn-key deployments. For more information, go to Go-Station.com.
