## Revolutionising Compliance Management

ISO+™ represents a significant advancement in the field of compliance management. By automating and simplifying the complex processes involved in ISO certification, ISO+™ helps organisations reduce the time, effort, and cost associated with maintaining compliance. This software is designed to be intuitive and easy to use, making it accessible to businesses without extensive expertise in ISO

standards.

## Key [Features](#) of ISO+™

**Comprehensive Compliance Tools:** ISO+™ provides a full suite of tools to manage all aspects of ISO compliance, including document control, audit management, risk assessment, and corrective action tracking. These features cover every step of the compliance process, from initial documentation to ongoing audits and risk management.

**Complete ISO Documentation Solution:** ISO+™ stands out in the market by offering a comprehensive solution for managing the extensive documentation required for ISO certification through handling document version control, approvals, and updates, reducing the administrative

burden and enhancing overall compliance management.

**User-Friendly Interface:** The platform's intuitive design ensures that users can easily navigate and utilise its features without extensive training or technical knowledge. This ease of use makes ISO+™ an ideal solution for businesses of all sizes, from small enterprises to large corporations.

**Customisable Workflows:** ISO+™ offers flexible, customisable workflows to suit different organisations' specific needs and processes. This adaptability allows businesses to tailor the software to their unique operational requirements, enhancing efficiency and effectiveness.

**Real-Time Monitoring and Reporting:** With ISO+™, organisations can monitor their compliance status in real-time and generate detailed reports to track progress and identify areas for improvement. This feature provides a clear, up-to-date picture of compliance status, enabling proactive management and quick resolution of any issues.

**Integrating with Other Tools:** ISO+™ seamlessly integrates with a myriad of platforms, including native connections like ChatGPT and external integrations with more than 2000 other applications through third-party integration platforms, effortlessly syncing your data and tasks across various platforms for enhanced collaboration and productivity.

**Secure Data Management:** The software ensures the highest level of data security, protecting sensitive information and maintaining compliance with data protection regulations. ISO+™ uses advanced security protocols to safeguard data, giving businesses peace of mind that their information is secure.

**Convenient Desktop and Mobile Apps:** Experience enhanced speed and convenience with the ISO+™ Desktop App, designed for Windows, macOS and Linux, as well as its mobile App, designed for iOS and Android, ensuring a fluid and uninterrupted workflow.

**Limitless Automation:** ISO+™ empowers businesses to establish meticulously defined and repeatable work processes, from setting reminders and sending emails to automating recurring tasks, to assist them in streamlining manual work, ensuring efficiency and precision.

Streamlining ISO Certification

"ISO+™ is a game-changer for businesses seeking ISO certification," said Dr. Arash Niavarani, Director of ISO Consulting Services. "Our goal was to create a solution that makes compliance management as straightforward and efficient as possible. ISO+™ is not an off-the-shelf software but a platform that brings our '5D: Dream, Design, Develop, Document, Deliver' motto to life. With ISO+™, organisations can focus more on their core business activities and less on the administrative burden of ISO compliance."
