Company*

The growth in the military simulation and training market is due to the increase in defense expenditure. North America region is expected to hold the largest military simulation and training market share. Major players in the military simulation and training market include BAE Systems PLC, Cubic Corporation, FAAC Incorporated, Israel Aerospace Industries Ltd., L-3 Communications Holdings

Inc.

[Military Simulation And Training Market Segments](#)

- By Type: Live, Virtual, Constructive
- By Environment: Synthetic, Gaming
- By Technology: IoT (Internet Of Things), 5G (5th Generation Mobile Network), Big Data Analytics, Artificial Intelligence, Cloud Computing And Master Data Management, AR (Augmented Reality) And VR (Virtual Reality), Digital Twin, Robotic Process Automation

- By Platform: Land, Maritime, Airborne
- By Application: Army, Aviation, Naval
- By Geography: The global military simulation and training market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

Military simulation and training refers to the handling of military equipment and weapons using simulation technology, which saves time and labor and potentially reducing technical wear on weapons and equipment, and is widely used in many forms of military equipment training. The main types of military simulation and training are live, virtual, and constructive. Live refers to a simulation in which actual people use genuine systems. Live is used in military simulation and training with a massive and costly logistical effort, whereas simulation is safer and less expensive, but does not provide participants with a comparable experience. It is provided through synthetic, and gaming environments using technologies such as IoT (internet of things), 5G (5th generation mobile network), big data analytics, artificial intelligence, cloud computing, master data management, AR (augmented reality) and VR (virtual reality), digital twin, and robotic process automation. It is performed on platforms such as land, maritime, and airborne, and used in applications such as the army, aviation, and naval.
