Decentralized finance (DeFi) refers to a category of financial systems and applications that operate on blockchain technology and aim to provide open, transparent, and decentralized financial services without the need for intermediaries such as banks or financial institutions. The main components of decentralized finance are blockchain technology, decentralized applications (apps), and smart contracts. Blockchain technology refers to a decentralized, distributed, and transparent digital ledger that securely records transactions across a network of computers. These are used in various applications such as asset tokenization, compliance and identity, marketplaces and liquidity, payments, data and analytics, decentralized exchanges, the prediction industry, stablecoins, and others.
