## Rising Incidences of Chronic Diseases Drive Market Growth

Rising incidences of chronic diseases are expected to propel the growth of the disposable syringes market going forward. Chronic diseases, such as diabetes, require regular medication administration, and disposable syringes provide a safer method for this. For instance, according to the National Library of Medicine, the number of people in the US aged 50 and older with at least one chronic condition is projected to increase by 99.5%, from 71.522 million in 2020 to 142.66 million by 2050. This rising

prevalence of chronic diseases is a significant driver for the disposable syringes market.

Explore comprehensive insights into the global disposable syringes market with a detailed sample report:
