

Navigating Growth: Pain Management Devices and Therapies Market Outlook 2024-2033

The Business Research Company's Pain Management Devices and Therapies Global Market Report 2024 – Market Size, Trends, And Forecast 2024-2033

LONDON, GREATER LONDON, UK, June 17, 2024 /EINPresswire.com/ -- The global market for pain management devices and therapies is on a rapid growth trajectory, projected to increase from \$4.38 billion in 2023 to \$4.83

billion in 2024, marking a compound annual growth rate (CAGR) of 10.3%. It will grow to \$6.49 billion in 2028 at a compound annual growth rate (CAGR) of 7.6%. This growth is driven by factors such as the rising prevalence of chronic pain conditions, increasing demand for minimally invasive procedures, and the expanding geriatric population seeking effective pain management solutions.

“

It will grow to \$6.49 billion in 2028 at a compound annual growth rate (CAGR) of 7.6%.”

Increasing Demand for Pain Management Driven by Rise in Chronic Diseases

The surge in chronic diseases like cancer and neurological disorders has intensified the demand for advanced pain management devices and therapies. Patients suffering from these conditions often require effective pain relief

strategies, boosting the market for innovative pain management solutions. According to the Brazilian Journal of Nephrology, approximately 60% of chronic kidney disease patients require pain management interventions, underscoring the critical need for these devices.
