

# AVer Launches AmpliWave SA-A5 Streaming Audio System for Engaged Classrooms

*AVer Europe is proud to introduce the latest innovation in classroom audio systems, the AVer SAA5 AmpliWave Streaming Audio System*

ROTTERDAM, NETHERLANDS, June 21, 2024 /EINPresswire.com/ -- AVer Information Europe B.V., an award-winning provider of [education](#) technology and Pro AV solutions, is proud to introduce the latest innovation in classroom audio systems, the AVer SAA5 AmpliWave Streaming

Audio System. This all-in-one package includes a Streaming Audio Box, a wireless teacher microphone, and speakers, providing a comprehensive solution to amplify the teacher's voice and enhance the learning experience. The [SA-A5](#) fosters a classroom environment of active participation, clear communication, and optimal teacher presentations.

Jose Rincon, Head of Product Management noted: "We're delighted to introduce the AmpliWave SA-A5, our latest audio innovation designed specifically for education environments. With its intuitive features and superior sound quality, the SA-A5 enhances the learning experience by ensuring clear and immersive audio in classrooms, during presentations, and virtual classes. We believe that this product will revolutionize education by empowering educators to deliver engaging and impactful lessons."

The SA-A5 AmpliWave System empowers teachers to manage classrooms more effectively through their natural speaking volume. By allowing instructors to speak in a normal conversational tone, the system eliminates the need for educators to strain their voices or shout over noise. This shift in tone creates a calmer and more controlled atmosphere, facilitating easier instruction comprehension and maintaining student focus.

In the era of remote and hybrid learning, the SA-A5 enables clear communication through its consistent sound quality, compatibility with online platforms, and an inclusive learning environment. Bridging the gap between online and offline education, the system ensures a

seamless and interconnected educational experience, breaking down traditional boundaries and supporting diverse learning modes.

"The launch of the SA-A5 demonstrates our commitment to providing educators with the tools they need to create dynamic learning environments. As classrooms continue to evolve, reliable audio solutions are essential for fostering effective communication and collaboration. With the SA-A5, we're enabling educators to deliver engaging and immersive learning experiences that inspire students and drive academic success." - Rene Buhay, SVP Sales & Marketing at [AVer Europe](#).

This classroom audio system includes:

**Streaming Audio Box:** Acting as a hub for the audio system, the Streaming Audio Box maximizes audio quality by seamlessly connecting to PCs and USB devices, revolutionizing audio systems available in the classroom. The box can control the volume of microphones, speakers, and PCs, and it also coordinates with announcements to minimize classroom disruptions during instructional time.

**Teacher Microphone:** The SA-A5's wireless microphone provides high-quality audio, allowing teachers to move freely around the classroom, interact with students, and utilize different teaching spaces without limitations for up to 8-10 hours of talk time. The teacher microphones also include an SOS button to send safety alerts when necessary.

**Crystal-Clear Speakers:** The system's speakers play a crucial role in instruction, explanations, and discussions. These speakers create an inclusive environment that offers all students equal access to learning. The SA-A5 ensures that every student can fully participate in class discussions and benefit from clear, resonant audio.
