[Rise in Prevalence of Autoimmune Diseases Driving Market Growth](#)

The rise in autoimmune diseases, where the immune system mistakenly attacks healthy cells, tissues, and organs, is a significant factor propelling the yeast infection treatment market forward. These conditions often lead to recurrent yeast infections, necessitating effective management through antifungal treatments. For instance,

the prevalence of type 1 diabetes (T1DM), a condition linked with recurring yeast infections, is expected to increase significantly by 2040, indicating a growing patient pool requiring targeted treatment strategies.
